Kolkata, India

SUMMARY

Computer Science undergraduate specializing in Machine Learning, Deep Learning, and Generative AI, with hands-on experience in Retrieval-Augmented Generation (RAG), prompt engineering, and building LLM-powered applications. Strong foundation in Python and core Computer Science concepts, focused on developing production-ready, data-driven AI solutions.

EDUCATION

Heritage Institute of Technology, Kolkata 2023 – Present
B.Tech in Computer Science and Engineering
CGPA: 8.1

Garden High School, Kolkata 2020 – 2022
Senior Secondary (ISC): 76%
Secondary (ICSE): 87%

PROJECTS

CheckUp – AI-Augmented Health Surveillance App (Internship)

- Working on architecture design for extending a live health tracking app across cardio, vaccination, and health overview modules.
- Applied Design Thinking to translate client-defined user journeys into structured user stories and acceptance criteria using AI-assisted tooling.
- Collaborated with a cross-functional team to build and maintain an agile product backlog aligned with real client requirements and wireframes.

Credence – AI-Powered Finance Tracker (LLM-based)

- Built an intelligent expense tracking system using the Google Gemini API for automated expense categorization.
- Designed prompts and structured input pipelines to improve classification accuracy and consistency.
- Integrated API-based inference to generate real-time financial insights for users.

EkoNet – Emergency Response System (Hackathon Project)

- Designed a system for real-time reporting of environmental and wildlife incidents.
- Developed core logic for incident handling and response coordination.
- Collaborated in a team to deliver a working prototype within 36 hours.

TECHNICAL SKILLS

Programming:	Python, Java, C++, C
Machine Learning & Deep Learning:	Data Mining, Supervised Learning, Neural Networks, Feature Engineering, Model Evaluation, Exploratory Data Analysis (EDA)
AI / LLM:	Retrieval-Augmented Generation (RAG), LangChain, ChromaDB, Prompt Engineering
Libraries/Frameworks:	PyTorch, Scikit-learn, LangChain, ChromaDB, FastAPI
Tools:	Git, GitHub, Jupyter Notebook
Core CS:	Data Structures & Algorithms, DBMS, Computer Networks, Object-Oriented Programming (OOP)

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification — Coursera (DeepLearning.AI)
- Exploratory Data Analysis for Machine Learning — Coursera (IBM)
- Deloitte Australia Technology Job Simulation — Forage

EXPERIENCE & ACTIVITIES

- Google Solution Challenge 2025 — Developed solutions using Google technologies.
- MLX 2.0 (GDG HITK) — Participated in an advanced Machine Learning hackathon.
- Status Code 2 (IIIT Kalyani) — Built an ML-based solution in a 36-hour hackathon.
